# IEEE/ASME AIM 2026 Sponsorship

As the flagship conference focusing on mechatronics and intelligent systems, the IEEE/ASME International Conference on Advanced Intelligent Mechatronics (AIM) brings together an international community of experts to discuss the state-of-the-art, new research results, perspectives of future developments, and innovative applications relevant to mechatronics, robotics, automation, industrial electronics, and related areas.

The AIM is co-sponsored by IEEE Robotics and Automation Society (RAS), IEEE Industrial Electronics Society (IES), and ASME Dynamic Systems and Control Division (DSCD). IEEE/ASME AIM 2026 will be held in Genova, Italy, on July 7th – 18th

IEEE/ASME AIM 2026 offers sponsorship opportunities for interested corporations. Companies interested in sponsoring will receive the items listed below as a part of their sponsorship package.

IEEE/ASME AIM 2026 offers exhibit spaces and welcomes companies, universities, publishers, and researchers to participate in the conference exhibition. With anticipated more than 400 conference attendees from universities, industries, and government agencies worldwide, IEEE/ASME AIM 2026 provides a great opportunity to advertise mechatronics related products, sell books, and increase the visibility of your organization. If you are interested in being a sponsor or need more information, please contact the General Chair or Industrial Committee Chair.

**>600 conference attendees**

## Topics and audiences

AIM is intended for a broad international audience, including Academic researchers and faculty, Graduate students and early-career scientists, Engineers and designers from industry, R&D professionals and technology managers, experts interested in emerging mechatronic and intelligent system technologies

- Robotics
- Bio-design and Manufacturing
- Inspection Robotics
- Industrial robotics and automation
- Artificial Intelligence
- Collaborative and soft robotics
- Human-robot collaboration
- Bio-design and Manufacturing
- Human-Machine Interfaces
- Product design and engineering
- Virtual prototyping and digital twin
- System design Integration
- Smart Materials and Structures
- Sensors and Actuators
- Automotive Systems
- Micro Electro-Mechanical Systems
- Modelling and Design
- Integrated methods for product design,
- Simulation, analysis, and optimization
- Space Mechatronics

- Human Factors in Mechatronics Systems
- Industry Applications
- Intelligent Systems
- Machine Vision
- Data Storage
- Fault Diagnosis
- Energy Harvesting
- Fluid Transmission and Control
- Micro Electro-Mechanical Systems
- Micro/Nano Technology
- Micro Electro-Mechanical Systems
- System Identification and Adaptive Control
- Motion Control
- Vibration and Noise Control
- Neural and Fuzzy Control
- Opto-Electronics and Opto-mechatronics
- Real-Time and Hardware-in-the-Loop Simulation
- Design for manufacturing and assembly
- Experimental methods in product development
- Human-Robot Interaction/Collaboration
